FYI, do you know about this?

With over 450,000 brownfield sites across America and new incentives from the Inflation Reduction Act, communities can embrace this opportunity to deploy clean energy on brownfields and turn them into **brightfields**. Rocky Mountain Institute (RMI) is partnering with Kansas State University's Technical Assistance to Brownfields program to launch the first-ever accelerator for brightfields projects.

There is an EPA training about this next week (sorry, internal only) but thought I would put it out there for other Development opportunities!

Have a great day!
Piper

The U.S. Environmental Protection Agency approves the submittal entitled, "Amendment to Operations and Maintenance Plan, South Tacoma Field Site, Soil Management Plan for Property Redevelopment Soil Management Plan" prepared for Bridge Point Tacoma LLC, dated October 19, 2022. Before this project is underway, please notify EPA and Ecology 2 weeks before fieldwork begins. If necessary, EPA and Ecology are available for "real time" consultation as excavation and

disposal of the soils identified in the Commencement Bay/South Tacoma Channel, South Tacoma Field OU 4 remedy occurs.

If you have additional questions, please contact me.

Sincerely,
Piper Peterson

Piper,

Good catching up with you earlier and thanks again for your help on this. Attached is a word doc that includes redline for the revisions we've discussed as well as a PDF of the revised, final Soil Management Plan, dated October 19, 2022.

Please let us know if you have any further questions or if we have EPA's approval of this document.

Thank you,

Subject: RE: Rev SMP: Bridge STF | 422756.5

To clarify, the changes are in the document entitled "2022-05-10 LOT" and these have already been incorporated into the 2nd attachment entitled "2022-03-24 REV_SMP_SWPP_STF_Site_Tacoma"? Scrolling through the 2nd attachment, I am not noticing any redline/strikeout which makes it harder to review.

I have attached a few comments I had in the first attachment. Once I am clear about the extent of the review needed for the 2nd attachment, I will finish that work, and/or approve this document if there are no changes identified.

Please note that I have included Erin Wever on this email. She is an EPA attorney with the Office of Regional Counsel, and will be taking the place of Ted Yackulic as the site attorney. I have provided a high level summary of this development, some of its challenges with the community and that it is currently undergoing a SEPA review. If you have any legal issues, please have your attorney reach out to Erin.

Thanks in advance for your forthcoming clarification,
Piper Peterson

Subject: FW: Rev SMP: Bridge STF | 422756.5

Piper,

Hope all is well. I'm working to help Bridge resolve some recent Ecology comments on the STF development's general construction permit. One of the comments requests EPA's approval of the current revision of the Soil Management Plan (SMP) and I'm having trouble finding it.

You may recall we revised portions of the SMP on March 24, 2022, to address previous permit application comments from Ecology. These changes were delivered to you in the email below and are attached in this email as well. I've also included a copy of the full SMP as revised on March 24, 2022.

I'm not finding a formal approval of the March 24, 2022 SMP in my inbox and I want to ask if you could send us formal approval of the revised document. Let us know if we need to discuss or if there is a formal approval email floating around that I may be missing.

Thank you for your time and help,

Subject: Bruce Titus Docs & Rev SMP: Bridge STF | 422756.5

Piper:

Regarding South Tacoma Field (STF) I've attached the 2002 Stemen reports associated with the adjacent Bruce Titus facility. I've also included a letter of transmittal with two sections of the Soil Management Plan (SMP) that were revised to align the SMP with the SWPPP that was submitted with the Construction Stormwater General Permit application. The revisions were to Section 3.3 Erosion and Sediment Control and Section 3.10 Infiltration Basin Construction. The changes are all non-substantive to the plan's ability to continue to meet RAOs at STF.

Let us know if you'd like to discuss any of these items or need additional detail.

Thank you for your time,
